

## Hygienic measures against the illness Covid-19 for securing a safe operation of Lipno Lake Resort

All apartments of Lipno Lake Resort are fully equipped separated residential units that are accessible by separated entrance from the outside. There are no corridors and common areas where a higher number of guests could gather compared to other accommodation facilities of a hotel type. The risk of any infection is minimized thanks to this disposition of our resort.

However, our Lipno Lake Resort team does not underestimate the current situation and we have taken strict hygienic measures:

- All apartments are always disinfected with suitable disinfectants by our staff after a thorough cleaning **before the arrival of our guests. The hand disinfectant** is available in the apartments for free.
- **Entering the common area of the reception is allowed only separately** as a family or guests of one apartment.
- The common inside **area of the reception is disinfected regularly four times a day**, a **hand disinfectant** for guests is available **at the entrance** for free.
- All **resort staff is instructed properly** how to follow the ordered hygienic rules and they observe these rules strictly.
- **Parts of the common outdoor areas** such as handles, handrails and apartment doorhandles, playing items of the outdoor children's playground, the entrance to the sports field and the area of an outdoor swimming pool, outdoor waste containers are **disinfected once a week**.
- The same **hygienic rules** used for the area of the reception are used also for the **resort sports rental shop** including **the regular disinfection of the rented sports equipment**.
- The area of an **indoor children's corner** has been **closed** for now to minimize the risks completely.

**No case of infection by Covid-19** has been diagnosed to the employees of Lipno Lake Resort or even in the close region so far.

We are looking forward to seeing you soon!

Your Lipno Lake Resort Team
